

Reference Gas Mixtures

- Providing world-leading accuracy and the lowest uncertainty for your measurement systems
- Accredited against the requirements of ISO 17025
- Primary standards
 - prepared by high precision gravimetry
 - verified analytically by traceable comparison methods
 - fully compliant with ISO 6142 – Part 1
- Secondary standards
 - calibrated by high precision comparison methods against primary standards by ISO 6143
- Wide range of mixture types available (natural gas, LNG, CEM, blast furnace)
- Excellent lead-times

*Relax, EffecTech® has
all your gas quality
measurement
requirements covered*

Reference Liquid Mixtures

EffecTech's new Collapsible Liquid Vessel Cylinder

- New cylinder technology designed for liquid hydrocarbon reference mixtures
- Excellent quality liquid mixtures available in a conventional cylinder
- LPG and NGL reference liquids maintained as a single phase liquid over the lifetime of the mixture
- Ideal for both laboratory and process calibration requirements
- Developed in EffecTech's cutting-edge Research and Development Laboratory
- Patent pending technology
